NatureScape Irrigation Service Evaluations

- a. Ensure that evaluations are performed in a manner that is consistent with established protocols.
- b. Perform NatureScape Irrigation Service evaluations on properties located within the water service area supported by each of the SECOND PARTIES.
- c. On an annual basis, conduct an initial evaluation on at least three sites that are to be selected at the discretion of each of the SECOND PARTIES. The NatureScape Irrigation Service evaluation will be performed by a Broward County staff person with training in irrigation system design and operation, expertise in landscape best management practices, and with permission and participation of the property manager/owner. The initial evaluation will serve to assess current rates of water consumption as a function of existing landscape design and maintenance, and based on the existing irrigation system condition and standard operation. Following the initial evaluation, the NatureScape Irrigation Service will provide the property owner/manager with specific recommendations for reducing total irrigation demands and increasing irrigation system efficiency through appropriate modifications in the landscape design, and irrigation system maintenance and operation. The results of the evaluation will be summarized in a site report to be distributed to the property owner/manager, presented in quarterly and annual program reports, and will include: a description of the irrigation system and site; list of recommended improvements; summary of current water consumption, potential water savings, and water savings realized as a result of the initial evaluation.
- d. No more than three months following the initial evaluation, conduct a follow-up evaluation of the three sites selected by each of the SECOND PARTIES. The follow-up evaluation will consist of an assessment of the degree to which the site-specific recommendations have been implemented and quantification of the water savings achieved as a result of the recommended improvements. The results of the follow-up evaluation will be presented to the property manager/owner and presented in quarterly and annual program reports.
- e. Identify and coordinate property managers/owners interested in pursuing NatureScape Certification as part of the NatureScape Irrigation Service evaluation. The County will provide property managers with expert assistance in developing a Florida Friendly landscape in order to meet the NatureScape Broward certification criteria. Properties certified as NatureScape properties as a result of the NatureScape Irrigation Service evaluation will be provided with unique signage to reflect this achievement and will be identified in the quarterly and annual program reports.

- f. Conduct additional NatureScape Irrigation Service site evaluations within each service area in accordance with the schedule presented in EXHIBIT "A." The number of additional NatureScape Irrigation Service evaluations to be performed will reflect each of the SECOND PARTIES' relative contributions to the total operational budget. These additional NatureScape Irrigation Service evaluation sites may be selected at the discretion of the COUNTY and may be identified based on the participation of property owners/managers in the Broward "Know the Flow" course. Each of the SECOND PARTIES will be notified in advance of additional evaluations to be conducted within their respective service areas. Evaluations will be conducted in accordance with the protocol detailed above in sections 2.1.a, 2.1.c, and 2.1.e.
- g. Prepare a five-year summary of the program accomplishments, including:
 - 1) total number and location of properties evaluated;
 - 2) analysis of potential versus actual water savings achieved as a result of the program;
 - 3) discussion of realized improvements in landscape practices with consideration of water quality implications;
 - 4) identification of NatureScape properties certified as a result of the NatureScape Irrigation Service, and;
 - 5) assessment of the overall performance of the NatureScape Irrigation Service.

ARTICLE 3

SECOND PARTIES' RESPONSIBILITIES

- 3.2 The annual lists of properties shall be submitted to the Natural Resources Planning and Management Division of the Broward County Environmental Protection Department by December 6th of each contract year, to enable the COUNTY to conduct the specified number of annual evaluations and prepare quarterly and annual reports in a timely manner.

¹ Total costs for each year reflect a 5% cost of living increase.

² It is estimated that a total of 177 evaluations will be completed in a year. Each participant will select 3 properties for an initial and follow-up evaluation. The follow-up evaluation will be used to calculate long-term water savings resulting from the service. The additional evaluations will be allocated based on each party's service area population relative to the population for the total area included in the study. Each utility is guaranteed three (3) "initial" evaluations, plus the additional evaluations identified in the last column above. Regardless of how subsequent sites are identified, each party will be notified of evaluations to be conducted in their respective service area and the results of each evaluation, which will be presented in both quarterly and annual reports.
